Retention of 5% net economic interest - CRD II Article 122a & BIPRU 9.15.4R

Godiva Mortgages Limited has undertaken in the Deed of Charge to the Issuer and the Note Trustee, on behalf of the Noteholders, that it will retain at the date of issuance a material net economic interest of at least 5% of the nominal value of the securitised exposures in accordance with Article 122a of Directive 2006/48/EC (as amended by Directive 2009/111/EC) (which does not take into account any implementing rules of the CRD in a relevant jurisdiction), referred to as the Capital Requirements Directive (CRD II). As at the Closing Date, such interest comprised an interest in the first loss tranche, in this case the Class Z VFN, as required by Article 122a. Godiva Mortgages Limited can confirm that as at the Report Date, it has not sold or hedged this interest.

Additional Loans may be sold to the Issuer during the Further Sale Period to the extent that there are sufficient Principal Receipts to fund such sale and subject to the Additional Loan Conditions, the Loan Warranties and the Estimated Revenue Deficiency condition.

As at:

30/04/2013

The Seller operates a number of variable administered rates including a Standard Variable Rate.

Arrears includes any fees and insurance premiums that are past due and interest on arrears. Capitalised arrears are excluded from the Arrears Balance.

Authorised Investments comprise short term cash deposits maturing before the next Interest Payment Date. The deposits are only made with counterparties that meet the strict ratings criteria set out in the Transaction Documents. Investments must either (a) mature within 90 days and be rated at least F1+ by Fitch and P-1 by Moody's and, if the investments have a long-term rating, A by Fitch and A2 by Moody's Moody's or (b) mature within 30 days and be rated at least F1 by Fitch and P-1 by Moody's and, if the investments have a long-term rating, A by Fitch and A2 by Moody's

Class Z Variable Funding Notes are unrated notes which are not publicly issued, listed or traded and are held by Godiva Mortgages Limited. The Class Z notes are subordinated to the General Reserve Fund and have been established to provide credit and, given their subordination, yield enhancement to the programme. The Prospectus provides that the General Reserve Fund shall not be available to meet any deficit of interest on Class Z notes or meet a deficit caused by a debit balance on the Class Z Principal Deficiency Ledger.

Constant Default Rate is calculated from the current mortgage balance of loans entering into default in the month and is shown as a percentage of the opening True Balance

The Constant Prepayment Rate is calculated from the total Unscheduled Principal Receipts and is shown as a percentage of the opening True Balance. This is consistent with the ESF definition for Constant Prepayment Rates.

For the purposes of this report a loan is identified as being in default where the Months in Arrears is six or more.

Employment status of the primary applicant. People employed by a company of which they are also a director are included as Self-Employed.

This is defined as the revenue amounts stated in the most recent waterfall junior to the General Reserve Fund applied to the outstanding 'A' notes.

During this period the Seller may sell Additional Loans to the Issuer to the extent that there are sufficient Principal Receipts to fund such sale and subject to the Additional Loan Conditions, the Loan Warranties and the Estimated Revenue Deficiency condition. The Further Sale Period will end early if certain performance triggers occur, if there is an Event of Default or at the option of the Seller.

The value disclosed at the month end is equal to the value calculated on the calculation date immediately preceding the month end.

This uses the regions in the HPI Regional Series published by Nationwide Building Society. The definition of those regions is available at

http://web.archive.org/web/20100815095614/http://www.nationwide.co.uk/hpi/regions.htm. This definition differs from the standard NUTS 1 regions used in other reporting.

Income verification has been requested on all mortgages in the pool at application. With certain low-risk low-LTV loans, proof of income is only required for a random selection of loans. The performance of the loans and decline/withdrawal rates on the random selection is closely monitored.

Indexation is applied to house price valuations on a regional basis using non-seasonally adjusted data. The indexation is applied as at the end of March, June, September and December.

Payments received in a reporting period are applied first to interest and then to principal.

Months in Arrears is calculated as the Arrears balance divided by the normal contractual payment due, ignoring any temporary arrangement or payment holiday.

A mortgage account consists of one or more underlying loans all secured with equal priority by a first charge on the same property and thereby forming a single mortgage account. All items are disclosed at mortgage account level with the exception of Interest Rate Type, Loan Purpose and Interest Rate Split which are reported at an individual loan level.

The aggregate amount of scheduled and unscheduled principal, and interest collected during the reporting period.

Losses are allocated to the Class Z PDL first and then to the Class A PDL. A debit balance on the Principal Deficiency Ledger will be eliminated to the extent there are excess revenue receipts available during the period. Any uncured debit balance on the notes appears on page 2

Principal Payment Rates are calculated from the total Principal Receipts in the month including redemptions, contractual repayments and unscheduled prepayments and are shown as a percentage of the opening True Balance. The ESF uses the term "Principal Payment Rates" for this value.

Payments received in a reporting period are applied first to interest and then to principal.

Balances and arrears for this entry are taken as of the possession date.

Balances and arrears for this entry are taken as of the date the property is returned.

In these cases the Servicer receives rent directly from the tenant as part of the mortgage payment under the Law of Property Act (LPA).

Principal Receipts may be retained in this ledger during the Further Sale Period for up to six months to fund Additional Loans.

The element of Principal Receipts that are included in the contractual payment for a Borrower who has a Repayment or Combination mortgage.

Under the terms of the programme, the Seller may sell additional assets into the pool in exchange for assets that have been repurchased under the terms of the Asset Conditions.

The Step Up Date occurs on the first Interest Payment Date after the fifth anniversary of the end of the Further Sale Period. The issuer may call the Class A notes at any time on or after the Step Up Date.

As at the given date, the aggregate (but avoiding double counting) of (i) the original principal amount advanced to the relevant Borrower and any further amount advanced, (ii) any interest, fees or charges which have been properly capitalised and (iii) any other amount (including Accrued Interest and Arrears of Interest) which is due or accrued (whether or not due) and which has not been paid and has not been capitalised.

The element of Principal Receipts that are not Scheduled Principal Receipts.

Available Revenue Receipts and Available Principal Receipts are allocated in accordance with the "Cashflows" section of the Base Prospectus to enable the payments on the Notes to be made on the relevant dates, subject to there being sufficient available revenue and principal receipts. Note payment dates fall quarterly on 7 March, June, September and December or the next business day. Waterfalls reported in the Investor Report refer to the latest quarter that has been calculated.
